Soils and Landscapes

A scenic landscape photograph of a mountain range at sunset. The mountains are rugged and covered in patches of snow, with their peaks illuminated by the warm, golden light of the setting sun. In the middle ground, a dense forest of evergreen trees stretches across the scene. In the foreground, a calm body of water reflects the entire scene, creating a mirror image of the mountains and forest. The overall atmosphere is serene and majestic.

Day one field trip – Via what interests you

- Join up in a group of 2 or 3
- 1st Characterize each landscape
 - What factors did your group use to describe these landscapes?
- 2nd Group landscapes into common settings.
- 3rd Work together to determine what variables ‘your’ landscapes place on soil formation, quality and health?
