

## Iowa's Emerging Water Issues from Contamination to Recreation – Session 2

### **Homework #2, 20 points** – 5 points each

1. Compare the water cycle you created during the with the USGS Water Cycle handout provided this week. List then briefly describe (a sentence or two) parts of the water cycle that were not in your original drawing (up to 5 new variables)
2. List and briefly describe three aspects Groundwater changes in Iowa flow that were also described this week's paper where mentioned in Chad and Bob's presentations? List and briefly describe.
3. Identify four of the most thought-provoking items/concepts from this week's content (2 from the lecture and 2 from the paper).
4. What are two (topics, words, concepts) you could use some help to understand from this week's work?
